DFARS Specialty Metals – Self Certification

In accordance with 10USC 2533B, AMI - Aerospace Manufacturing, certifies that within the calendar year of 2019, more than 50% of the materials purchased for the production of fasteners made of “Specialty Metals”—as defined in 10USC 2533B(I)—are purchased from suppliers which melt “specialty metals” domestically.

As such, we consider ourselves compliant to the requirements of 10USC 2533B(H)(3) set forth by the Defense Federal Acquisition Regulation Supplement (DFARS).

Sincerely,

Philippe A. Hakimi  
Client Outreach Manager
